EDUCATION

VIT Bhopal University September 2023 – May 2027

B.Tech. in Computer Science (AI and ML), 4th Year (Final Year) | CGPA: 7.21

- Coursework: Object-Oriented Programming (OOP), Database Management Systems (DBMS), Data Structures & Algorithms (DSA), Operating Systems (OS)

DAV Public School, Ranchi, India April 2023

12th Grade – High School Graduation

- Coursework: Physics, Chemistry, Maths, Computer Science, Web App

EXPERIENCE

Bharti Airtel – Head Office, Gurugram May 2026 – July 2026

Software Development Intern, Offline Internship

- Independently built a full-stack SaaS platform (Angular, FastAPI) combining AST-based static analysis, a **local LLM (Ollama)**, and a **Neo4j knowledge graph** to auto-generate enterprise-level HLD, LLD, and commented source code from any repository, folder, or pasted code.
- Validated the platform across **5 real-world codebases** (including FastAPI, Flask, and Celery), achieving **86% overall documentation accuracy** (88% LLD, 82% HLD) at a ~4–5 minute average generation time.

CERTIFICATIONS

Google IT Support Certificate March 2026

Google

Applied Machine Learning in Python January 2026

Coursera

Zero to Mastery Python Developer May 2025

Udemy

PROJECTS

Automated Technical Documentation Platform

- Adds a Neo4j-backed, **GraphRAG-driven semantic search** layer onto the Bharti Airtel documentation platform, enabling context-aware code retrieval across large, unfamiliar codebases.

  Tools used: Angular, Python, FastAPI, Ollama, Neo4j, Docker GitHub Repository

ZENITH: AI-Powered Mental Health & Well-Being Platform

- Engineered ZENITH, a technology-driven mental health & well-being platform, implementing a responsive front-end (HTML, CSS, JavaScript) and integrating a machine learning model with **92% accuracy**, while documenting the complete ML pipeline across 20+ structured Jupyter Notebook cells covering preprocessing, training, and evaluation.

  Tools used: Jupyter Notebook, JavaScript, CSS, HTML GitHub Repository

Skin Cancer Detector

- Developed a computer vision web app using deep learning to analyze skin lesion images, generating top-3 diagnostic predictions with confidence scores from a model achieving **92% classification accuracy**.

  Tools used: Jupyter Notebook, JavaScript, CSS, HTML GitHub Repository

SKILLS

Languages: C++, Java, Python, JavaScript, SQL

Frameworks & Libraries: React, Angular, FastAPI

AI/ML: Machine Learning, Deep Learning, Computer Vision, LLM Integration, GraphRAG, Semantic Search

Web: HTML, CSS, REST API

Databases: Microsoft SQL Server, Neo4j

Tools: Docker, GitHub, Postman, Jupyter Notebook

Soft Skills: Problem-Solving, Organizational Skills, Communication Skills, Leadership, Adaptability
